

ALL INDUSTRIES ROPE ACCESS

INDUSTRIAL ROPE ACCESS | NSW

Capability statement

Maintenance. Inspection support. Rescue. Specialist access.

BUSINESS OVERVIEW

All Industries Rope Access provides specialist access for industrial maintenance, shutdowns, building façades and wind-energy assets. Based in Anna Bay and Forster, NSW, the team discusses scope, site conditions, competencies and access requirements before agreeing an engagement.

CORE CAPABILITIES

Industrial & shutdown support - Tank and vessel maintenance access, structural work, rigging, blasting and painting.

Inspection support - Access and coordination for structural inspections and NDT/MPI/DPI oversight.

Confined space & rescue - Confined space work, standby rescue and site coordination.

Buildings & height safety - Façade maintenance, window cleaning, sealing and anchor-system work.

Wind energy - Personnel experience in turbine blade repairs, inspections and confined space work.

TEAM & TECHNICAL LEADERSHIP

Dennis Yates - IRATA Level 3

Rope access supervision, industrial maintenance and rescue, with commercial diving and vessel operations experience.

Jackson Fechney - IRATA Level 2

Industrial rope access delivery within the agreed supervision and rescue arrangements.

SELECTED PREVIOUS PERSONNEL EXPERIENCE

Dennis's previous roles include industrial shutdown and confined space work with Monadelphous and Geovert (2016-2019), façade and anchor-system work with Skywalker Rope Access (2017-2018), and wind turbine blade repairs and inspections with TW Power Services (2018). These are previous personnel roles, not contracts attributed to All Industries Rope Access.

PROJECT APPROACH

Understand the work. Agree access, risk controls, permits and rescue arrangements. Coordinate delivery and document the agreed outcome. Environmental scoping includes site protection, material containment, waste handling and clean-up requirements.
